

The Road Map that keeps you on track to achieve strategic goals

How we deliver

Through workshop facilitation, we determine the current state of your business or business idea, and what you ultimately want to achieve. This gap is bridged by the Road Map that we develop during the workshop. We fill in the picture to develop a plan that is discussed, challenged, improved, and agreed on during the work session.

This Road Map will become central in your organisation. It offers you the opportunity to reflect on your direction. Are you on track? Are you following the plan as set out? Is your focus right? The storyboard reminds you of your plan when you're involved in your day-to-day activities to ensure that you keep focus on achieving your objectives.

Plan for return on investment

Business planning is often related to the application for funding, but there is more to it. A business plan forces you to think your business through. Thoroughly. It makes you think long-term, to determine which actions are required on the short- and mid-term. In a facilitated workshop, the VizBiz™ methodology is applied to draw a Road Map that becomes an active document in your day-to-day business operations.

- Workshop facilitation to challenge and agree on business direction;
- Development of the plan through participation, creating knowledge share and understanding of the objectives;
- Graphically documenting the plan for business growth.
