

## Process as a driver for Performance, Change and Improvement

### How we deliver

Through workshop facilitation, VizPro<sup>®</sup> goes far beyond 'mapping the process'. VizPro<sup>®</sup> ensures alignment of processes to strategy, while ensuring that all role players get an in-depth understanding of the purpose and detail of the process. Roles are clarified, and responsibilities and accountabilities agreed on in the work session.

VizPro<sup>®</sup> moves away from brown paper drawing, using Microsoft Visio as a preferred tool to draw content-rich and colourful images real-time during work sessions. This creates a lively environment where participants are invited to contribute and challenge, debate, and improve the process. VizPro<sup>®</sup> provides a forum to share and capture organisational knowledge, and to improve performance.

### Increasing Profitability

In documenting the processes we identify gaps and duplications, improving performance of the process. This removes inefficiencies, and results in cost savings. Next to these results that you will be able to measure, the following immediate results can be seen from applying this methodology:

- Your team will love the interactive workshop approach and will start 'talking and walking' their processes;
- Performance and staff morale will increase - people understand the 'big picture' and the importance of their respective roles in it;
- Buy-in to business change is high since all role players provide input;
- Knowledge transfer takes place and teamwork increases.

### About Pétanque

Pétanque is an office of Strategy Delivery, founded in 2001. Visit our website to read about:
