

Pétanque Business Specialists offers Business Analysis that subscribes to best practice principles as defined in the International Institute of Business Analysis (IIBA) Body of Knowledge.

Providing the critical link between the business and the development team, **VizBA** Business Analysts have an excellent understanding of business principles, are able to form good relationships with various project stakeholders and have a sound knowledge of IT systems and the development life cycle. This enables the **VizBA** Business Analysts to identify vital business processes and requirements and translate these requirements and processes into functional solutions for the development team.

VizBA Business Analysts are different because they are involved in projects from the requirements phase, through the development phase and all the way to completion, ultimately ensuring the success of the project by confirming that the technical deliverables match to the original business requirements.

The VizBA Offer

- Liaising with project stakeholders in order to identify and gather business requirements
- Managing expectations of the business
- Providing the critical link between the business and the development team
